LANDSCAPE SUPPLIES

AND MORE ...
Over the years, Urban Paving have established themselves as a solid brand and a market leader in the paving and landscaping industry.

Our products include an extensive range of paving; both concrete and natural stone, as well as quality landscape supplies and custom concrete pieces. We are a one stop shop for all paving and landscaping needs; whether it be for the experienced contractor or for DIY at home.

We believe our environment is the key to the success of our business. We seized the opportunity to source beautiful raw materials from our region, and assemble a team knowledgeable and committed to excellent production and customer service. Where possible we implement environmentally friendly practices and do all that we can to ensure all facets of our business are sustainable.

Importantly, we are community oriented; often supporting local schools and charities in whichever way possible. Our partnership with the landscape architecture students of Lincoln University is something we see as a vital and rewarding investment in the future of our industry. We also love being a part of the annual Canterbury A&P Show as it's a fantastic opportunity to get amongst and be involved with our local community.

Thank you for taking the time to look through our brochure; we hope it inspires you! Please don’t hesitate to contact us we are more than happy to help you in any way we can.

“Artworks have been using Urban Paving products and services for more than 15 years. Like a good wine they have improved with age, developing new products and consistently looking to improve their service. As Artworks has grown over this period, we have relied heavily on their ability to deliver on time with a quality product. We confidently refer our clients to Urban knowing they will receive excellent service and accurate information from a friendly efficient team.”

Ross Marriott - Artworks Landscape Ltd. Member- Landscaping NZ. LIANZ.
The team at Urban Paving was enthusiastic when I mentioned I was going to be exhibiting at the Ellerslie Flower Show and they immediately offered their support. The pavers I required were delivered to our site on schedule and my last minute requests were no problem at all. Urban Paving contributed a quality product to our exhibit and we were very happy with our gold-medal-winning result.

Emily McEwan - Outright Landscape Design
Gold medal winner at Ellerslie 2014

Bayley LuuTomes Design has been working closely with Dan Batchelor from Urban Paving for the past couple of years. He supplied the landscaping materials for our entire Ellerslie garden. Their top quality products added the finishing touches we desired. Working with the Urban Paving team is always easy even when out of town. Communication is forefront to completing our gardens project on time. Urban Paving is our first place of call when it comes to all our hard landscaping supplies.

Bayley LuuTomes - Creative Director & Landscape designer.
Urban Paving have been in the business of manufacturing quality pavers for over 30 years. Over this time we have developed the largest range of natural wet cast pavers to suit every situation and add value to your place.

We have the range. Whether it be a timeless smooth paver, the sandy textured finish, an English Yorkstone style, or a classic exposed aggregate, we have the paver for you.

We have the quality. Urban Pavers are made with the highest quality materials and many natural, sustainable products. All products are carefully manufactured with state-of-the-art technologies at our premises in Christchurch, where temperature, humidity and other variable conditions are controlled. This ensures you will receive the highest quality product which will stand the test of time.

**HOW DO I CHOOSE THE RIGHT PAVER FOR ME?**

For every paving project, options to be considered include colour, texture and size choices, in order to achieve the desired outcomes. Urban Paving offer a range of concrete pavers that will satisfy your design requirements.

Urban Paving offer you a choice of colour or aggregate from the following swatch range:

**CONCRETE PAVING COLOURS**

- Natural
- Urban Grey
- Charcoal
- Black*
- Mist
- Taupe
- Cream
- Wheat*
- Lustre
- Cappuccino*
- Driftwood
- Terracotta*
- Bronze

**EXPOSED AGGREGATES**

- Traditional
- Classic
- Crawford Hills
- Wackie
- Oamaru
- Shotover
- Orari Brown
- Westland

At Urban Paving we are constantly modifying our range of paving. Please refer to [urbanpaving.co.nz](http://urbanpaving.co.nz)

Urban Paving can also manufacture exposed aggregate pavers using your own specified aggregate.

*These are not stock colours and so cost an extra 20% to manufacture.*

For installation advice refer to our [LAYING GUIDE](#) on page 24.
Urban Paving manufacture four different textures of concrete pavers.

**TEXTURES**

Smooth textured pavers provide a classic, even finish for your paved area.

Urban Paving’s Sandy textured pavers have a grainy finish which is highly slip resistant, making them a safer choice for pool surrounds or areas where weather conditions may compromise the grip on the surface of pavers.

Exposed aggregate pavers showcase the aggregate and add a natural element to your paved area.

Yorkstone pavers give a classic English slate look and are often laid in a random pattern.

**EXPOSED AGGREGATE**

- Crawford Hills
- Sandy Taupe
- Exposed Aggregate
- Yorkstone

Urban Paving and Landscape Supplies

Urban Paving has used both natural products and modern technology to create a stylish range of Honed paving. Made using the South Island’s natural aggregates, from river and beach stones to sands and schists, our Honed pavers are an engineered smooth finished paver which offers great performance and longevity.

The honed surface of these pavers exposes the aggregate mix, creating a stunning effect which is sought after for paving and entertainment areas. With certified slip resistance they enhance all paved areas, recommended for courtyards, paths and patios.

Suitable for both indoor and outdoor applications, the range introduces nature’s appeal in a timeless paver which suits all types of homes, from classic to contemporary.

“We choose to use Urban Paving for our pavers and supplies because of their very high quality products and their exceptional customer services. They always go way beyond our expectations to make our job easier. A true bunch of champions.”

Ollie Newman - OnLandscapes

All colour reproductions printed on this brochure are as close as possible to the original, however some variations will occur in product colour and shading, aggregate variability and due to the printing process.
CUSTOM MADE HONED PAVERS

Honed pavers can be individually designed using your own specific aggregate to present the colour, texture and effect that works back perfectly with unique landscape and architectural design. Specific aggregate can be selected and matched to individual requirements, and Urban Paving will work with you until the desired look is achieved.

ENHANCEMENT AND CARE OF HONED PAVERS

Honed pavers are a high-value, quality product. To ensure a superior finished effect, we recommend sealing the Honed pavers after their installation. Sealed pavers are protected in much the same way as varnished timber – dirt and stains will wipe off more easily – and sealing will also bring out the unique colour definition of the aggregates used. Honed pavers are a specialised engineered aggregate paver made specifically to order. Manufacturing time is typically between 3 to 5 weeks, but this can vary depending on order size etc.

HONED PAVING SIZES

Urban Honed Pavers can be produced in a wide range of sizes to suit all applications. The table presents our standard range of honed paver sizes, however, other sizes can be tailored to suit a particular commission.

Nominal 38mm thickness

NB: Paving sizes are nominal, we recommend having a grout line of 9-15mm between pavers to allow for any small variations.

“We recommend Urban Paving, not only because of their excellent products and service, but also because their extensive display area enables our clients to view and select the product that best suits their paving project.”

Ken Lomax - Ken Lomax Landscaping Ltd.

For installation advice refer to our LAYING GUIDE on page 24.
With a passion for the most hard-wearing and aesthetically pleasing stones of the world, Urban Paving has introduced an exciting range of natural stone paving products.

Each stone is unique in both texture and colour; this is part of the beauty of natural stone. Together, the colours create a great blend of natural tones within a controlled colour palette. Natural stone brings quality and durability to your outdoor area, and weathers beautifully in our natural environment.

Our range of natural stone is sourced from reputable international quarries in China and India, (personally visited by Urban Paving to ensure they comply with our quality and ethical standards), and from our own back yard, the South Island’s West Coast.

Natural stone paving is available in a choice of colours. Each has its own charms and characteristics, and our different shades will suit a range of home exteriors, from classic to contemporary. Colours we hold in stock in a various range of sizes are Pipi, Cloud, Walnut and Pearl.

Natural stone paver thickness nominal 20mm

All colour reproductions printed in this booklet are as close as possible to represent the natural stone colour, remembering that natural stone is exactly that and there will always be variation within one colour, that is the beauty of natural stone.

For installation advice refer to our LAYING GUIDE on page 24.
NATURAL STONE TEXTURES

Just like the natural colour variation, there is a range of textures within natural stone. We offer Natural Split, a bold, rugged texture which blends well in an outdoor area, and is consequently the most popular choice for New Zealand homeowners. The Honed texture, most popular in Pipi, is a beautifully smooth paver with excellent slip resistance, even when wet. It can be used both indoors and outdoors.

WAITAHA SPLIT PAVING

While many of us may have a love of the exotic, others cannot look past the beauty of New Zealand. From the South Island’s West Coast, natural West Coast stone brings a depth, quality and untamed element unique to this place. This largely under-utilised stone is a sparkling grey colour, and looks stunning for walling, outdoor living areas, pathways, pool and fire surrounds.

ARGENTIA SCHIST PAVING

Argentia Schist is another stunning stone sourced from the Central Otago region.

It is unique in its mix of grey and autumn tones, the iron in the stone oxidises over time creating the rich orange colour. It is ideal for paving or outdoor features such as pathways and cladding.

BULLNOSE PAVERS

Many homeowners choose sandstone pavers for their pools, entertaining areas and pathways because of their slip resistance and natural beauty. Urban Paving can provide bullnosed pavers for the soft edges around pools and steps, and can bullnose on more than one side as requested. There are some limitations for salt water pools and natural stone, please enquire to Urban Paving.

WAITAHA STEPPING STONES

The Waitaha Stepping Stones, also from the West Coast, are a sparkling grey colour. They are of a circular shape, ranging in size from 300mm to 700mm, and are popular for garden pathways.

"Urban Paving’s natural split and honed sandstone has been the most consistent in size, colour and quality I have ever used. It is a pleasure working with the team with their great service and problem free deliveries."

Brent Wright - Director, Nelson Tile & Slate Centre Ltd

Urban Paving and Landscape Supplies urbanpaving.co.nz 9
Our honed bluestone pavers are one of the newest additions to our natural stone range.

Sourced from the highest quality controlled quarries in China, honed bluestone paving is unique in both colour and texture. The honed texture of the stone provides a contemporary feel while still retaining its natural charm and character, including the honeycomb veins that run through the stone. Essentially honeycombing is a naturally occurring pitted pattern, which brings a natural, pumice like texture to the paving. This effect creates interest and casts pattern over the paving.

Being a natural product, bluestone pavers are extremely hard-wearing and easy to maintain. This product is already proving popular with our customers; it’s a stunning addition to any outdoor area. We recommend that bluestone is sealed to protect from staining and to make cleaning and maintenance easier.

EXTREMELY HARD-WEARING AND EASY TO MAINTAIN

At Goom Landscapes our various projects produce their own unique challenges. From design issues to the day-to-day completion of paving works, Urban Paving have always worked diligently to ensure the smooth completion of our landscape projects.

For installation advice refer to our LAYING GUIDE on page 24.

All colour reproductions printed in this booklet are as close as possible to represent the natural stone colour, remembering that natural stone is exactly that and there will always be variation within one colour, (that is the beauty of natural stone).
GRANITE

Our flamed granite pavers are another new addition to our natural stone range.

Sourced from the highest quality controlled quarries in China, flamed granite paving is unique in both colour and texture. The flamed texture of the natural stone, available in black, white and grey, creates a modern look while still retaining its individual character. The texture of the flamed granite also maximises the slip resistance of the paving, making it ideal for pools and steps. Being a natural product, flamed granite pavers are extremely hard-wearing and easy to maintain. This not only makes them a beautiful product but a practical one too. We recommend that granite is sealed to protect from staining and to make cleaning and maintenance easier.

Note: Black granite can have some (approximately 15%) hairline cracks. This is part of the nature of granite being a natural stone; it does not affect the structural integrity. Sealing will partially conceal these cracks. We recommend using Dry-Treat 40SK and StainProof.

Urban Paving have a vast range of products that satisfy all of our client’s requests and once installed the end results make for a fantastic landscape.

Gareth Ford - Director, Solace Landscape Architecture

NATURAL STONE SETTS

If you desire a classic cobbled driveway or path, then have a look at our natural stone setts.

These are natural granite setts available in black, white or grey, and Bluestone setts which have been used for centuries in Europe. We have two grades available; pedestrian (90 x 90 x 40-50mm) which are great for pathways and features, and vehicle (90 x 90 x 70-80mm) which are perfect for driveways.
Over the years Urban Paving have developed a range of concrete products which are designed to suit indoor and outdoor living situations and styles.

**URBAN PLANTERS**

Urban Planters are a stylish and timeless addition to any outdoor space.

Suitable for both classic and contemporary home and business environments, they are available in 4 sizes and in any of our range of Urban concrete colours or as Exposed Aggregate (See Concrete Paving colours, page 4).

- **Large Square**: 540 Square x 560 (H)
- **Long Trough**: 1035(L) x 430(W) x 360(H)
- **Tall Skinny**: 430 Square x 700(H)
- **Small Square**: 430 Square x 360(H)

We can custom make planters to suit your requirements, please see page 15 and contact us for more information.

“The team at Urban are always a pleasure to work with providing service and delivery you can count on.”

Claire Urwin, New Vision Landscapes
**CROSSING BLOCKS**
Available in four sizes these are used for crossing over deep gutters from the street and onto driveways and footpaths.

Available in the following sizes:
- 425mm x 500mm
- 475mm x 500mm
- 450mm x 500mm
- 450mm x 600mm

**DOG BOWLS**
Large: 340mm
Small: 180mm
These dog bowls are very solid and are a great alternative to the conventional plastic bowl. Your dog will have a hard time trying to tip over or move these!

**BIKE STAND**
Dimensions: 640mm (L) x 230mm (W) x 110mm (H)
Great for tidying up the kids bikes. Best for mountain bike tyres.

**LOG ROUNDS**
460mm
Both Log Rounds and Rounds are great to use as stepping stones, either around the garden or out to the washing line.

**BORDERS**
Urban borders are available in a smooth finish in any of our concrete colours. They are popular for use as a mowing strip or to define a garden edge.

Dimensions: 500mm x 100mm

**PYRAMID CAPS**
These Urban pyramid caps are great for letterboxes, garden posts or pillars around your property.

Available in the following sizes:
- 670mm x 670mm
- 560mm x 560mm
- 425mm x 425mm
- 335mm x 335mm

**PYRAMID CAPS**
These Urban pyramid caps are great for letterboxes, garden posts or pillars around your property.

Available in the following sizes:
- 670mm x 670mm
- 560mm x 560mm
- 425mm x 425mm
- 335mm x 335mm

**GULLY TRAPS**
A handy way to protect and tidy drains. Traps and grates can be purchased together or separately.

**BORDERS**
Urban borders are available in a smooth finish in any of our concrete colours. They are popular for use as a mowing strip or to define a garden edge.

Dimensions: 500mm x 100mm

- 335mm x 335mm

**GULLY TRAPS**
A handy way to protect and tidy drains. Traps and grates can be purchased together or separately.
Urban Paving has developed an exclusive range of natural stone products imported from India to compliment our existing range of natural stone paving and concrete products. The natural beauty of these products make them suitable for a range of living and entertaining areas, from classic to contemporary.

**NATURAL STONE TABLES AND TABLE TOPS**

A beautiful natural stone table is the ideal way to add that finishing touch to your indoor or outdoor entertainment area. Crafted from a solid piece of stone, the natural variation in the stone means each table top is unique in colouring and patterning, ensuring your table is one of a kind. Natural Stone tables can be available with a range of bases, either ordered with the table or custom made to your requirements.

Dimensions and weights are approximate and will vary. Please enquire for details of items currently in stock. Specific items can be purchased to order.

**NATURAL STONE URNS**

Our Natural Stone urns are individually crafted from a solid piece of stone, making them an excellent and unique garden feature. The range of colours and sizes available mean that they are suitable for a range of outdoor living and garden situations. These urns can also be modified to become amazing water features. If you have a specific design that you would like, contact us with the details here at Urban Paving and we will cost it for you.

Our Natural Stone urns are available in medium (750mm x 350mm) or large (1100mm x 600mm), and come in either Teak or Pearl colour.

Due to the varying nature of the product, all sizing stated is approximate. All colour reproductions printed in this booklet are as close as possible to represent the natural stone colour, remembering that natural stone is exactly that and there will always be variation within one colour, that is the beauty of natural stone.
Urban Paving are excited to now manufacture custom concrete pieces for those wanting something bespoke and individual.

For those who don’t want to buy ‘off the shelf’, a custom concrete piece is the perfect option. Whatever your needs and desires, we can design and create something just for you and your unique space.

With custom concrete the possibilities are endless; furniture, hearths, bench tops, signage and decorative pieces are amongst just a few of the items we can manufacture. We work with you from beginning to end to really understand what you’re after and to deliver a quality custom piece that is as individual as you are. Whether you’re wanting something to complement our paving and landscaping range or a stand out feature piece, we’re more than happy to help. Have a look at the images here for ideas and inspiration and get in touch with us to discuss your requirements.

“Urban Paving is your one stop shop. The product range is huge and the customer service is second to none.”
Alister Carleton - Allscapes Ltd
Here at Urban Paving, we believe great paving goes hand in hand with great landscaping. It is for this reason that we have developed an extensive range of landscape supplies to complement our paving range. We are a “One-Stop-Shop” supplier, aiming to provide you with the highest quality aggregates, soils, composts and barks, mainly sourced from throughout the South Island.

**Urban Paving and Landscape Supplies**

**Crusher Dust**
A 0-5mm material with silts and small chip up to 5mm. It is used for bony spots on bases and under pavers.

**Premix**
A mixture of washed sands and stones up to 13mm. Used for concrete work. Use 1.5 bags cement per scoop for lower strength (e.g. pathways) and 2 bags cement per scoop for higher strength (e.g. driveways). (Note that reinforcing mesh is required in some situations).

**Basecourse (AP20 and AP40)**
Two sizes of crushed product used as a base for driveway, path and paving preparation. Normally requires a depth of 60-150mm, depending on stability required and existing land stability. When installed requires compacting.

**AGGREGATES**

**Blackstone Chip**
Available in two sizes, medium (8-14mm) and chunky (50mm). This black chip from south of Dunedin has become popular for its striking look, especially if in a water feature. The smaller size is ideal for paths, driveways or decorative gardens and the chunky size looks great to give a rugged texture look in decorative gardens.

**Ivory Lime Chip**
Available in three sizes; 0-7mm, 15mm and 50mm. This is a stunning white chip sourced from sunny Marlborough. It is an alternative to the traditional limestone colour. It is used mainly in pathways and gardens.

**Limestone Chip**
A 5-12mm creamy yellow chip. Best suited for paths, decorative gardens and driveways (will crush down over time).

**Limestone Chip - Amuri**
A neutral off-white coloured 12-20mm limestone chip. Popularly used for paths, driveways and decorative gardens.

**Golden (Oamaru) Pebble**
An attractive white, gold and orange decorative pebble. Used to add colour to paths, decorative gardens and water features.

**20 or 40mm**

**Teddington Chip**
This is a Canterbury favourite, a local coloured chip from Banks Peninsula available in 20mm or 40mm. It has earthy brown and terracotta undertones and can be used in gardens and pathways.

**25-40mm**

**Shotover Schist**
A Central Otago Schist with colours of gold, silver and brown. It is often used for paths, decorative gardens and water features. This stone is also used in our exposed aggregate and honed Crawford Hills paver. Available in two sizes, 5-10mm and 20mm.

**20 or 40mm**

**Westland Schist**
A special schist from our very own West Coast, it has sparkling grey tones which make it a real standout feature for your garden or outdoor entertainment area. This stone is used in our exposed aggregate and honed Westland Schist paver.

**5-10mm**

**Chunky**

**Teddington Chip**
This is a Canterbury favourite, a local coloured chip from Banks Peninsula available in 20mm or 40mm. It has earthy brown and terracotta undertones and can be used in gardens and pathways.

**25-40mm**

**Ivory Lime Chip**
Available in three sizes; 0-7mm, 15mm and 50mm. This is a stunning white chip sourced from sunny Marlborough. It is an alternative to the traditional limestone colour. It is used mainly in pathways and gardens.

**20 or 40mm**

**Limestone Chip**
A 5-12mm creamy yellow chip. Best suited for paths, decorative gardens and driveways (will crush down over time).

**Limestone Chip - Amuri**
A neutral off-white coloured 12-20mm limestone chip. Popularly used for paths, driveways and decorative gardens.

**Golden (Oamaru) Pebble**
An attractive white, gold and orange decorative pebble. Used to add colour to paths, decorative gardens and water features.

**Crusher Dust**
A 0-5mm material with silts and small chip up to 5mm. It is used for bony spots on bases and under pavers.

**Premix**
A mixture of washed sands and stones up to 13mm. Used for concrete work. Use 1.5 bags cement per scoop for lower strength (e.g. pathways) and 2 bags cement per scoop for higher strength (e.g. driveways). (Note that reinforcing mesh is required in some situations).

**Basecourse (AP20 and AP40)**
Two sizes of crushed product used as a base for driveway, path and paving preparation. Normally requires a depth of 60-150mm, depending on stability required and existing land stability. When installed requires compacting.
There are five sizes of grey riverstones available as detailed above. Depending on which size they can be used for fill under concrete, backfill etc., but are all popular for landscaping.

**Greystone Chips**
Available in two sizes, 10mm and 13mm. Used for pathways (10mm) and driveways (13mm).

**Peagravel**
Small (6mm) rounds, good around pipes, fill or landscaping.

**Rounds**
(13mm, 19mm and 40-65mm), **Tailings** (20-40mm) and **Boulders** (65-120mm)  
There are five sizes of grey riverstones available as detailed above. Depending on which size they can be used for fill under concrete, backfill etc., but are all popular for landscaping.

**Black Sand**
A course striking sand that can be used in pathways and water features or to make a dark coloured ornament.

**White Sand**
A 'pure' sand from the foothills of Mid Canterbury. Used to achieve a white mortar for lighter colour bricks. Can be used for 'special' sandpits.

**Golden Sand**
Gold coloured sand from Oamaru. Used to achieve a gold coloured mortar for light coloured blocks and bricks. Can be used for the kids 'special' sandpits.

**Brick Sand**
A grey coloured fine sand. Mainly used by bricklayers for a grey mortar.

**Plastering Sand**
Grey medium sand. A general purpose sand used for plastering and concrete work and to improve drainage on lawns and gardens. Used as a bedding sand and under pavers. The most popular sand for sandpits (drains well, does not stain).

**Westland Flats Stones**
These stunning flat stones can be used for any decorative purpose indoors and outdoors. Available in three sizes, 25-70mm, 70-130mm and 130-200mm.

**Scoria**
An 8-20mm red volcanic rock. It is a hard and porous rock but very light, resembling pumice. It is suitable for garden pathways and any ground cover. Mixing scoria at planting time will also help drain water.

**Oreti Gold Pebble**
This is an attractive 8-14mm decorative stone from the deep south. It is a mix of a grey and burnt orange colour. It is also known as 'fruit salad', - for obvious reasons!

**Arctic White**
This is a very rare, all white 8-14mm pebble from the deep south and an alternative to Awarua and Kapuka.

**Kapuka Pebble**
This is an attractive mix of 8-14mm grey, green and white pebble from the southern South Island.

**Awarua Pebble**
This is a predominantly 8-14mm white pebble with a small amount of grey and an alternative to the Kapuka or Arctic.

**SPECIALITY COLOURED STONES**

**8-14mm**

**8-20mm**

**25-70mm**

**SPECIALITY SANDS**

**Black Sand**
A course striking sand that can be used in pathways and water features or to make a dark coloured ornament.

**White Sand**
A 'pure' sand from the foothills of Mid Canterbury. Used to achieve a white mortar for lighter colour bricks. Can be used for 'special' sandpits.

**Golden Sand**
Gold coloured sand from Oamaru. Used to achieve a gold coloured mortar for light coloured blocks and bricks. Can be used for the kids ‘special’ sandpits.

**Brick Sand**
A grey coloured fine sand. Mainly used by bricklayers for a grey mortar.

**Plastering Sand**
Grey medium sand. A general purpose sand used for plastering and concrete work and to improve drainage on lawns and gardens. Used as a bedding sand and under pavers. The most popular sand for sandpits (drains well, does not stain).

**Westland Flats Stones**
These stunning flat stones can be used for any decorative purpose indoors and outdoors. Available in three sizes, 25-70mm, 70-130mm and 130-200mm.

**Scoria**
An 8-20mm red volcanic rock. It is a hard and porous rock but very light, resembling pumice. It is suitable for garden pathways and any ground cover. Mixing scoria at planting time will also help drain water.

**Oreti Gold Pebble**
This is an attractive 8-14mm decorative stone from the deep south. It is a mix of a grey and burnt orange colour. It is also known as 'fruit salad', - for obvious reasons!

**Arctic White**
This is a very rare, all white 8-14mm pebble from the deep south and an alternative to Awarua and Kapuka.

**Kapuka Pebble**
This is an attractive mix of 8-14mm grey, green and white pebble from the southern South Island.

**Awarua Pebble**
This is a predominantly 8-14mm white pebble with a small amount of grey and an alternative to the Kapuka or Arctic.
SOILS AND COMPOSTS

Screened Soil
A quality soil screened out to be a fine texture making it friable and easier to work with. Ideal as top soil for that perfect lawn or garden or for general landscaping.

TurfMix
A fine blend of screened soil, animal based compost and plastering sand. Used for topdressing lawns.

VegeGrow
A blend of screened soil, animal manure compost and mushroom compost, specifically formulated for optimum growth in vege gardens and vege planter boxes. Plant straight into it.

GardenGrow
A blend of animal based compost and screened soil, specifically formulated for flower gardens and planter boxes. Plant straight into it.

Zoom Grow
A mushroom based compost, with rotted sawdust and other ingredients to form a nutritive compost mixture. Take care to avoid acid loving plants (e.g. Rhodos, Azaleas and Camellias) unless cultivated into the soil (50:50 minimum).

BioBlend
This is a dark coloured matured blood and bone based soil conditioner/organic compost with a high supply of micronutrients, beneficial for a wide range of garden uses. It is high in nitrate nitrogen which plants love.

Mushroom Compost
A compost which makes an ideal mulch or top layer for your vegetable garden. Should be careful to avoid acid loving plants, e.g. Rhodos, Azaleas and Camellias.

Pig Mix
A mix of sawdust and pig manure, ideal for breaking down stubborn soils.

MEASUREMENT AND WEIGHT GUIDES
The following will assist you in determining the quantities you require (approximate only).

### MISCELLANEOUS PRODUCTS

#### SLEEPERS
Used for driveway edgings, pergolas, planter boxes and raised vege gardens.

- **Macrocarpa**: Quality 200mm x 100mm sleepers, available in 2.1m or 3.0m lengths.

#### PEA STRAW
Ideal to retain soil moisture, suppress weeds and add body to your soil. Check for availability as it is a seasonal product.

#### PUNGAS
An authentic New Zealand product to provide a native element to your garden as edging or fencing. Available in 2.0m lengths.

#### HAPUKA BOULDERS
Choose from a huge range of Hapuka boulders in various shapes and sizes. They make excellent features. We can also source other rocks from around the South Island, just get in touch.

#### ORGANIC COMPOST
Cultivate into soil to provide nutrients. Improves water retention and soil structure.

#### PREMIUM POTTING MIX
Plant straight into it, ideal for flowers, shrubs and ornamentals.

#### EZ STREET ASPHALT
Ready to use, high performance, cold asphalt. EZ Street Asphalt requires no mixing, works in water and at all temperatures, and sets on compaction ready for traffic immediately. Apply in 3 easy steps: sweep the area, fill with asphalt and compact with a shovel or car tire.

#### WEEDMAT
Stops those weeds from coming through, - a non woven domestic weed control. UV stabilized and made to allow maximum water flow to plant roots.

#### DIY PRODUCTS

- **Mortar Mix**
  Add water for a mortar mix for under paving, bricklaying or grouting between pavers.

- **Pave-Set**
  Sand with silicon adhesive for grouting between pavers.

- **Cement**
  General purpose cement.

- **White Portland Cement**
  General purpose cement used for lighter coloured grout and mortar.

- **Pre-Mixed Concrete**
  Just add water for instant concrete. 15 minute pre-mixed concrete also available.

- **Hydrated Lime**
  Used in mortar and plaster work. Can be added to soil to aid plant growth.

- **Brick Ties**
  Used for brick laying. Available in bags or buckets of 250 or 500 in short or long.

- **Paving Sand**
  Dry sand for easy flow between pavers.

- **Mortar Mix**
  Add water for a mortar mix for under paving, bricklaying or grouting between pavers.

- **Pave-Set**
  Sand with silicon adhesive for grouting between pavers.

- **Cement**
  General purpose cement.

- **White Portland Cement**
  General purpose cement used for lighter coloured grout and mortar.

- **Hydrated Lime**
  Used in mortar and plaster work. Can be added to soil to aid plant growth.

- **Brick Ties**
  Used for brick laying. Available in bags or buckets of 250 or 500 in short or long.

- **Paving Sand**
  Dry sand for easy flow between pavers.

#### TRAILER HIRE
and we also do deliveries
Stonelock Paving is an innovative and unique landscaping product. It is a plastic honeycomb mat with a permeable, weed resistant geotextile base. It invisibly locks stones and pebbles into place, preventing stone movement and the creation of ruts.

Stonelock Paving can be used in most situations including pedestrian pathways, gardens, sloped pathways, driveways, turning circles and car parks. It is a great alternative to and provides a more natural look than poured concrete.

- Quick and easy to install.
- Super strong, enhanced load bearing causes no ruts, separating or sliding with vehicle traffic.
- Addresses a wide range of erosion control, earth retention, slope protection, and stability issues.
- Keeps maintenance costs low with easy upkeep and less gravel required.
- American Disability Association (ADA) compliant for pedestrians, bicycles and wheelchair traffic.
- Geotextile backing prevents weed growth and adds stability.
- When filled with stones or pebbles sheets are practically invisible.
- SUDS (Sustainable Urban Drainage Systems) and LEED (Leadership in Energy and Environmental Design) compliant means minimal environmental impact.
- Easily add parking lines and edge indicators with markers.

Stonelock Paving is available in two colours (dark and light to match stone colour). All Stonelock Paving comes with a geotextile base already attached to stop weeds coming through. The recommended aggregate size to use in Stonelock sheeting is 6-15mm.

Stonelock Paving sheets are 1150mm x 800mm and 30mm deep (0.96m³). 1m³ of pebbles covers approx 30m².
**HELPFUL INSTALLATION TIPS**

- If your Stonelock paving is laid on a surface which is flat or does not have natural drainage, you need to create an outlet for the water. Have the paving sloping towards a narrow trench and lay a drainage coil wrapped in filter cloth into the trench. Connect this into a storm water drain or soakage trench away from the site.

- When using an expensive decorative pebble, you only need to use the top layer for this pebble to create a great look. The sheets can be mostly filled with an economical driveway chip. Then use a rake to flick out the top layer of stones, creating a “nest” for the decorative pebbles. Fill the decorative pebbles to approximately 15 mm above the mat so the driveway chip will not be visible. You will have a beautiful finish at a bargain price.

- Leave cutting and laying of the edge Stonelock paving until the last job to ensure that the measurements are spot on.

- Oil drips or stains can be easily removed by simply scooping up those few pebbles and raking out the surface again.

**BEFORE YOU BEGIN**

**Stonelock Grade:** This guide is for pedestrian and light vehicle Stonelock installations only. Installation for heavy vehicle Stonelock should be planned and carried out by a professional. It requires specific design and a good understanding of foundation conditions, as truck and bus loads are much higher.

**Area:** The area is simply calculated by measuring the width and length of the area to be paved.

\[
\text{Length (m)} \times \text{width (m)} = \text{area (m}^2)\]

**Stonelock Sheet Units:** Calculate the Stonelock sheets required.

\[
\text{Area to be installed (m}^2) / \text{sheet size (refer to page 20)} = \text{number of sheets required} \]

(please note: if cuts are required you may need extra sheets).

**EXCAVATION**

**Pedestrian and Vehicle Grade:** Remove the topsoil. Excavate a minimum of 110mm for pedestrian grade and 210mm for vehicle grade, (allowing for minimum 50mm and 140mm basecourse respectively), 20mm crusher dust, and a further 40-50mm for the Stonelock sheet and pebbles. Please note that any loose or soft subgrade also needs to be removed, allowing a stable surface to begin Stonelock installation on.

**LAY BASECOURSE**

Correct base preparation is perhaps the most important part of the paving project. Like a road, the end product is only as good as the base it is laid on. The base course is a compacted granular fill used to build up areas, set levels and provide a strong, stable layer to support the laid Stonelock sheets. Fill in the base course and compact to a uniform dense condition. The final surface of the base course should match the contour of your finished project with no bumps, and no holes deeper than 10mm.

**LAY BEDDING**

Spread an approximate 30mm layer of crusher dust on top of the compacted base, and compact this layer too. Screed the surface so it follows the contour you want for your driveway.

**INSTALL EDGE**

Edging is recommended around your Stonelock paving area. It protects the edging of your Stonelock sheets, keeps the pebbles on the mat, and makes a suitable edge so mowers don’t fling the pebbles around. You can use paving borders, wooden framing or other suitable material for edging, or butt the mat against walls or existing paved areas.

**LAYING THE STONELOCK PAVING**

Stonelock sheets are large, light and easy to lay. Simply lay the mats in a staggered pattern and make any required cuts. Then clip the sheets together using the interlocking connectors on all sides to form one continuous matrix. When laying the mats be sure to overlap the weed mat flaps (from underneath the mats) to ensure no gaps, or alternatively, fit strips of weed mat in if there are gaps between the Stonelock sheets, or trimmed edges.

**SPREAD THE PEBBLES**

Pour the pebbles or gravel onto the Stonelock sheets and spread around with rakes until the sheets are covered. The pebbles will settle into the sheets over time, so may require a top up later, particularly in high traffic areas. Once the job is finished, thoroughly water the surface to clean the pebbles.

**ENJOY YOUR EASY-CARE STONELOCK PAVING!**
THE WORLD’S BEST ARTIFICIAL GRASS

EASIGRASS – make the most of your space and time.

Artificial grass, and especially Easigrass, is becoming more popular, both world-wide and here in New Zealand. People are beginning to realise the advantages that artificial turf has to offer. Easigrass is useful in situations where conventional lawn is impractical or high maintenance. This artificial grass looks extremely realistic and stays looking great all year round with minimal maintenance required. Imagine never having to worry about mowing or watering your lawn or spraying it for weeds! Easigrass gives you more time to do the things you enjoy!

Here at Urban Paving we stock the premium Mayfair grade of Easigrass which comes in rolls 2m or 4m wide. This artificial turf can easily be cut to fit areas of any shape and, with the right instructions and equipment, is relatively easy to install.

“We need quality products and service from all our suppliers. Urban Paving is excellent, great products, efficient and friendly service and on-time deliveries, so we can get on and get the job done.”

Jock Scott – Director, Landscapes Unlimited
CARE AND MAINTENANCE

FURTHER INFORMATION, CARE AND MAINTENANCE OF YOUR PAVERS

Throughout this brochure we have put together some paver tips and advice to help you get the best possible finish to your landscaping project. Please bear in mind that this list is not exhaustive and will not substitute for experience to get a good finish. Some further points to consider are:

Concrete – a natural product

- Concrete is a natural product which creates a chemical reaction (curing) for at least 1 month after manufacture. Most curing is in the initial days, decreasing as time progresses, depending also on the conditions. Exposure to different elements will affect this reaction and changes in shading can occur.

- Concrete pavers are made from natural products and there are natural processes of concrete that occur beyond our control. Urban Paving cannot guarantee perfect shade consistency and therefore accept no responsibility for variation in the shade of pavers that has occurred naturally, or as a result of the pavers not being cared/installed in the recommended manner.

Paver dimensions

- Paver size is nominal only and is subject to normal manufacturing tolerances. By having the recommended 10-15mm grouting gap any variations are easily catered for.

Like a good wine, pavers mature with age

- Concrete pavers will age and weather over time, so site conditions can cause a shade variation of the pavers over time. This is not a reflection of the performance of the paver, and any such variation will decrease over time as the paver matures.

Efflorescence - the love hate relationship of pavers!

- Efflorescence is the phenomenon of natural salts migrating to the surface of the concrete as water moves in and out, leaving a whitish powder like discolouration on the surface of your pavers. Efflorescence will settle and cease over time. Often, the better the quality and strength of concrete, the more efflorescence appears due to the high cement content.

Natural Stone is exactly that - Natural!

- Natural Stone has natural variation in colour, texture and size, and this is all part of what the product is about. This makes the installation of natural stone an art as well as a science. Installing natural stone is different from installing concrete pavers, so if you have limited experience with the product please be aware that there are tricks to the trade, particularly relating to the variation in the colour and surface texture. Colour and texture variations are normal and do not effect function or quality of the product.

- Natural Stone is quarried from different parts of a quarry, so there will always be variation in each paver and shipment of pavers. It is recommended that, when using multiple pallets of natural stone for your project, you use pavers from different pallets and mix them when laying.

- Whilst we will assist you with your project, we will not accept responsibility for the normal natural variations in colour, surface texture or product that we consider normal for concrete or Natural Stone.

Looking after your Natural Stone

- The best way to clean natural stone paving is with a water hose and a stiff broom. NEVER use HydroChloric acid to clean natural stone paving. See our cleaning products on page 27 for more information.

More information for you

- Please read further information on the pallet docket of The Beautiful Nature of Concrete and Natural Stone before installing your paving. It provides further information to ensure you achieve the best results for your landscaping project.

WARRANTY

Urban Paving offer a warranty against faulty product, which must be made prior to installation. Claims for faulty product will not be entertained when installed, or for poor installation. Please contact us if you have any queries regarding the product prior to installation.
PAVER LAYING GUIDES

Before you start any paving project, it is necessary to carefully plan the work. This guide provides a step by step process taking you from start to finish. A plan of the area to be paved should be accurately drawn and marked out on site. It is important to determine the finished levels of paving when planning the project. Check with your local Council on any height requirements specific to your site.

Urban Paving recommend using the professional laying guide as it removes variation and provides a better finish.

RECOMMENDED PROFESSIONAL LAYING

MATERIALS REQUIRED

The quantity of the materials needed for the paving job depends upon the total area to be paved.

AREA

The area is simply calculated by measuring the width and length of the area to be paved.

\[ \text{Length (m)} \times \text{width (m)} = \text{area (m}^2) \]

PAVING UNITS

Calculate the pavers required.

\[ \text{Area to be paved (m}^2) \times \text{the number per m}^2 \text{ (on the price list)} = \text{total number of pavers required} \]

We advise ordering an extra 3-7% depending on complexity to allow for cuts etc.

BASE COURSE

A minimum of 100 mm of compacted base course (AP20) is required for under paving, this may need to be thicker in some situations (a stable concrete pad can be used instead of base course).

\[ \text{Area to be paved (m}^2) \times 0.01 \text{ (allows for 100mm of base course)} \times 1.3 \text{ (allows for compaction)} = \text{m}^3 \text{ of base course required} \]

SAND AND CEMENT - MORTAR

10-30 mm of mortar is required for under paving, depending on the levelness of your base. 1 m³ will cover approximately 30 square metres @ 30mm depth.

\[ \text{Area to be paved (m}^2) \times 0.03 \text{ (allows for 30mm thick sand)} = \text{m}^3 \text{ of sand required} \]

For every m³ of sand you will need four to five 40kg bags of cement, and it is recommended to add a plasticizer (cemplus, febmix etc).

SAND AND CEMENT - GROUTING

Grout is used to fill the gaps between the paving units once laid. A scoop (0.3m³) of sand and and three to four 40 kg bags of cement will cover approximately 50 square metres of paving, depending upon the size of joint spaces.

EXCAVATION

It will generally be necessary to excavate the area to be paved. The depth of this excavation will depend upon the thickness of the paver plus the 30mm of mortar and 100mm of compacted base course material if required. Any loose or soft areas in the sub-grade should also be removed and replaced with compacted material.

BASECOURSE

Correct base preparation is perhaps the most important part of the paving project. Like a road, the end product is only as good as the base it is laid on. The base course is a compacted granular fill used to build up areas, set levels and provide a strong, stable layer to support the laid paver. Fill in the base course no thicker then 100mm and compact to a uniform dense condition, especially around manholes and kerbs (if more than 100mm is needed compact in layers). The finished texture of the basecourse should not allow sand to filter through. The final surface of the basecourse should match the contour of your finished paving, with no bumps, and no holes deeper then 10mm. Please note this can be substituted with a stable and load bearing concrete pad.

PREPARING THE MORTAR

Mortar should normally be made at a ratio of 5 parts sand to 1 part cement (more cement may be needed in certain circumstances), mix this in a concrete mixer dry and then slowly add water (and 1-2 caps of plasticizer per barrow load) until you meet the desired consistency. This should be about the consistency of mashed potato, wet enough that it can be tamped down but dry enough to support the weight of the paver. Plasticizer makes the mortar more workable and slows down the curing process allowing more time to lay the pavers.
LAYING THE PAVERS

Ensure pavers are laid so water drains off (typically a slope of 1-2%). A free draining base is necessary so the pavers do not have ‘wet feet’ (can cause excessive mottling). It is generally best to start in a corner or along a straight edge such as the house footing. Set up string lines and place enough mortar on the base to cover the entire area of the paver (this ensures the paver is well supported) and slightly deeper than required. Place the pavers in the desired pattern on the mortar leaving your desired gap (normally approx. 10mm) between each paver. Tap the paver into place using a rubber mallet, use string lines, a spirit level and regular visual checking of the paving to keep all the joints straight and the finished product level. Always work from on top of the base course, staying off the pavers that have just been laid for at least 24 hours to allow the mortar to set.

CUTTING THE PAVERS

Leave cutting and placing of the edge pavers until the last step. Carefully mark the pavers to be cut and use a diamond concrete saw (available from most hire centres or contact Urban Paving for details on our cutting service).

GROUTING THE PAVERS

Grouting should normally be done a couple of days after laying. If you are planning on sealing the pavers it is recommended that the first coat is done before grouting. Grout should normally be made at a ratio of 2 parts sand to 1 part cement, mix this in a concrete mixer dry and then slowly add water until you meet the desired consistency. This should be fairly dry, wet enough that it can be pressed to create a smooth surface but dry enough to hold its shape. Carefully press this into the paver gaps, packing it down into any voids and then running a grout tool across the top to get a consistent finish. Use a damp sponge to clean off any grout that is on the paver surface. If a coloured grout is desired the oxide powder should be mixed with the sand and cement before any water is added. It is important that mixes are consistent in the amount of sand, cement and oxide used to ensure a seamless grout line.

HELPFUL TIPS

Here are a few tips to help ensure that you produce a first class job:

• When paving a slope it is important to start at the bottom and pave up the slope.

• It is recommended that the same person mixes all grout and mortar to ensure consistency between batches.

• Do not leave sand, mortar, grout or objects lying on the surface of the pavers for any length of time when initially laid as it may cause staining or shadowing.

• If you are sealing your pavers it is recommended that the first coat is applied before grouting.

• For natural stone paving or if you are laying in dry conditions, paint a slurry (very wet mortar - paint like in consistency) on the back of the pavers before placing on the mortar bed, this minimises popping.

For recommended contractors please see the information section on our website: urbanpaving.co.nz

DIY LAYING

This is essentially the same as the professional laying guide with the difference of the pavers being laid on bedding sand rather than mortar and the grouting is done with PaveLock rather than a sand and cement mix. Excavation and basecourse preparation are the same.

LAYING PAVERS ON SAND

Sand provides support for the pavers but will not hide irregularities in the basecourse, it is important therefore that it is level as this will determine the levelness of the pavers. Only spread enough sand for the pavers you will lay in one session. Don’t compact the sand as it will compact under the paver. Place the pavers using the desired pattern on the screed sand leaving your desired gap (recommend between 10-15mm at top of paver).

FILLING THE JOINTS

Our recommended DIY option to fill the joints between the pavers is to use Pave-Lock (aka PaveSet). This is dry sand mixed with a silicon adhesive to bind the particles together and provide a more professional finish. Closely follow the instructions on the bag.

For recommended DIY contractors please see the information section on our website for more details and tips: urbanpaving.co.nz
The first thing to consider should I seal my pavers?

There is no right or wrong answer to this question - it is a personal choice and is a bit like varnishing timber. Sealing does protect the paver from staining, helps preserve the original appearance of the paver, and can deepen the colour. It can however require some ongoing maintenance, depending on which sealer is used. We believe only a relatively small percentage of concrete pavers are sealed, with people preferring to allow the pavers to age and weather with the surroundings.

We therefore recommend that first, you should find a reason to seal, and there are some good reasons. Please look at the flow chart to see if you should seal.

**SHOULD I SEAL MY PAVERS?**

- **Concrete**
  - Do you want to minimise the aging process of your pavers and provide some stain protection? **Yes**
  - **Use Dry-Treat Stain Proof**
  - **Use Lustre Seal**

- **Natural Stone**
  - Do you want to enhance the colour? **Yes**
  - **Use Dry-Treat 40SK and Stain-Proof**
  - **Use Dry-Treat Stain-Proof and Intensifia**

- **Natural Stone around a salt water pool**
  - **Use Dry-Treat 40SK and Stain-Proof**

- **Unsealed**
  - **Don’t seal**
There are different types of sealers and cleaners. At Urban Paving we stock the following products:

**LUSTRESEAL SEALANT**

This is for concrete pavers only. It acts much like a varnish that puts a protective coating surface on the paver and deepens the colour.

**DRY-TREAT STAIN PROOF**

A natural look sealant which doesn’t alter the paver appearance. Super oil and water repellent for superior and permanent stain protection. 3 coats required for maximum benefit. We also stock Meta-Crème, a sealer only requiring 1 coat. Ask us for more information.

**DRYTREAT SEALERS AND CLEANERS**

Dry-Treat develops and manufactures the world’s leading high-tech sealers for the protection of porous materials, including natural stone, tile, paving, concrete and grout.

Dry-Treat sealers provide premium protection from common threats such as staining, water and salt damage, efflorescence, freeze-thaw spalling, picture framing, graffiti and mould growth, and make treated surfaces easier to clean and maintain.

Dry-Treat’s superior technology is internationally recognised. Dry-Treat began in 1991 by developing specialist sealers for the engineering industry to protect concrete structures in harsh environments. Over the last two decades they have developed their molecular engineering technology to create innovative sealers for a whole range of porous surfaces including natural stone, paving and tiles. Today, many bridges, wharfs, high rise buildings, stadiums and hundreds of thousands of homes are protected by Dry-Treat sealers.

20 years ago, they took advantage of the unique Dry-Treat super-penetrating, permanent bonding sealer technology to introduce the industry’s first manufacturer backed sealer performance warranties up to 25 years. Dry-Treat’s ‘no fine print’ warranties are still the gold standard.

15 year warranty when applied by an accredited Dry-Treat installer

Before sealing, it is important that the pavers are clean, as any marks or dirt will be locked in once sealed. Sealing does not completely protect paving. Please refer to the Information section our website for full details on cleaning and sealing pavers: urbanpaving.co.nz

### PAVING CLEANERS

<table>
<thead>
<tr>
<th>PROBLEM / APPLICATION</th>
<th>CLEANING PRODUCT</th>
<th>COVERAGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grout haze, efflorescence, rust stains, clay residue, bore water marks.</td>
<td>Hanaflin Skavenja</td>
<td>5sqm per quart undiluted or 15-50sqm per quart diluted.</td>
</tr>
<tr>
<td>Grease, grime, mould, algae, leaf marks, staining and soiling.</td>
<td>Hanaflin Oxy-Klenza</td>
<td>50-100sqm per quart for heavy duty cleaning and up to 500sqm per quart for light cleaning.</td>
</tr>
<tr>
<td>Organic dirt, grime, pollutants.</td>
<td>Hanaflin Sola-Kleena</td>
<td>80-100sqm per quart.</td>
</tr>
<tr>
<td>Kwila stains, moss, mould, spores.</td>
<td>Revive</td>
<td>4-5sqm per litre undiluted depending on method of application.</td>
</tr>
<tr>
<td>Exposing aggregate in pavers/concrete slabs, acid etching, and removing efflorescence from concrete pavers only.</td>
<td>Spirit of Salts</td>
<td>4-12sqm per 1L depending on concrete profile, conditions and desired effect.</td>
</tr>
</tbody>
</table>

NB: Coverage will vary with the porosity of each surface. The above guide will be suitable in most circumstances.
WHAT OUR CUSTOMERS ARE SAYING

“West Eyreton School would like to thank you most sincerely for the wonderful support you provided to our school’s Ellerslie Flower Show garden project. The show has been a highlight of our school year and the children have all commented that they will remember this experience for the rest of their lives.”

West Eyreton School

“Urban Paving provides us efficient and accurate services for both small and large paving project. The staff are professional, easy to work with and are experts in their fields. Their customer service is extremely responsive to our needs and always goes the extra mile in production, availability and supply. Urban Paving’s level of service, precision and competence has been outstanding.”

David Berry and Sabrina Fitt - Profound Paving Ltd.

“Outerspace Landscapes Ltd have been using Urban Paving and Landscape Supplies since we started business in 2006. They have a comprehensive range of quality products and their service is fantastic. They have fully supported us every year at the Ellerslie International Flower Show and have helped us in picking up 7 awards.”

Jordan Frizzell - Outerspace Landscapes Ltd.

“Inside Out Design have been working with and using the Urban Paving range of products for 18 years. They are great to deal with, innovative and dedicated to getting things right which was demonstrated when they developed our own custom made Inside Out honed paver. Their products are the best around and this is backed up with a quality service.”

Ben McMaster - Inside Out Design

“We choose to obtain our pavers and other landscaping supplies from Urban Paving. The staff are friendly and helpful and service reliable and on time. Products from Urban are of a consistent quality and their prices are reasonable. I’m sold!”

Craig Porter - Designer Dirt Landscaping Ltd.

“We have been using Urban Paving for supply of pavers and landscaping products for over 3 years. Their wide range of products is great, especially the Natural Stone which our clients love. They are easy to deal with and get on with the job!”

Josh Hastie - Trademark Paving

“Urban Paving supplies a huge range of excellent products and they have an efficient delivery service. They are very conversant with all products and are helpful getting orders out on time.”

Don Hazlett - Queenstown Paving Ltd.
